About the Company

LLC «Center Group» is a Russian full-cycle sawn timber producer located in Artemovskiy, Sverdlovsk Region. Our production facilities are equipped with state-of-the-art European machinery, ensuring consistently high product quality.

The company specializes in the production of:

Imitation log siding

Cladding (Vagonka)

Furniture panels

Finger-jointed blanks

Kiln-dried sawn timber

Monthly production capacity — up to **4 000 m³**

LLC “Center Group” is actively developing export operations. Products are supplied throughout Russia as well as to Kazakhstan, Georgia, and China. The company is ready for long-term supply partnerships with guaranteed quality and on-time delivery.

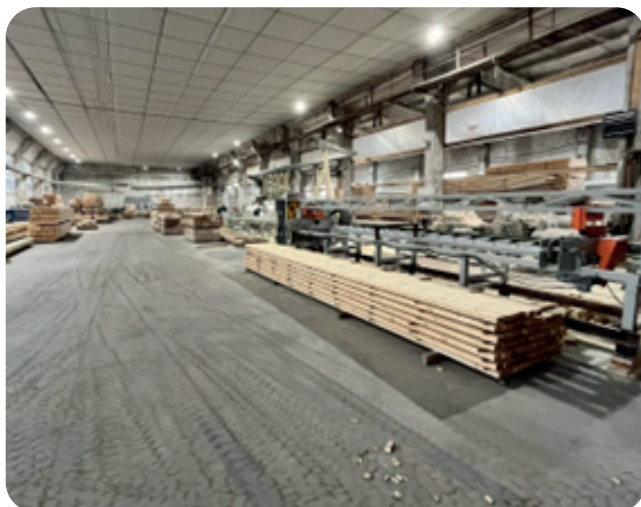

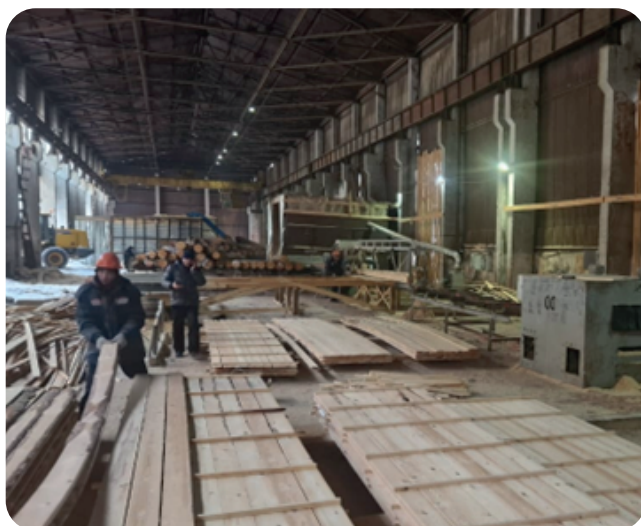

Production Capabilities

Sawing section — **4000 m³** of round timber

Drying kilns — **1900 m³** per load

Furniture panel and finger-joint production — up to **300 m³** per month

Products

Imitation log siding

Profiled board with beveled edges imitating glued timber. Made from coniferous wood (pine, spruce), kiln-dried to 10–12%.

Applications:

- Interior and exterior cladding for houses, saunas, and cottages
- Construction of timber-frame and wooden houses
- Decorative partitions and ceilings

Advantages:

- ✓ Natural wood aesthetics
- ✓ Easy installation due to tongue-and-groove system
- ✓ Excellent thermal and sound insulation

Thickness, mm: **16-20** Width, mm: **135 (141)** Length, mm: **2000/2500/3000/4000/6000**
 Wood species: **Conifer**

Cladding (Vagonka)

Planed profiled board with tongue-and-groove joints. Available in grades AB and Extra. Dried to 10–12%, packed in moisture-proof film.

Applications:

- Wall and ceiling finishing in baths, saunas, and SPA centers
- Interiors of country houses, hotels, restaurants
- Decorative interior elements

Advantages:

- ✓ Smooth surface and perfect geometry
- ✓ Suitable for high-humidity areas
- ✓ Durable, with a pleasant wood aroma

Thickness, mm: **12,5-14** Width, mm: **88-118** Length, mm: **2000/2500/3000/4000/6000**
 Wood species: **Conifer**

Products

Furniture Panels

Glued panels made from solid or finger-jointed wood. Minimal or no knots, smooth surface.

Applications:

- Manufacturing of tabletops, cabinet fronts, and doors
- Home and office furniture
- Interiors of premium facilities

Advantages:

- ✓ Natural wood look and texture
- ✓ Perfectly smooth surface for painting or varnishing
- ✓ Custom sizes and grades available

Thickness, mm: **18-40** Width, mm: **200-3000** Length, mm: **200-3000 mm** Wood species: **Conifer**

Planed Lumber

Precisely dimensioned timber processed on a four-sided planer

Applications:

- Wall frames, partitions, formwork
- Furniture, stairs, frames production
- Construction of utility structures

Advantages:

- ✓ Accurate geometry, no extra machining required
- ✓ Ready for use — no planing needed
- ✓ Universal for construction and manufacturing

Thickness, mm: **15-100** Width, mm: **15-100** Length, mm: **2000/2500/3000/4000/6000**
Wood species: **Conifer**

Products

Finger-Jointed Boards

Long boards glued lengthwise using finger-joint technology. Ensure dimensional stability and prevent deformation.

Applications:

- Furniture, doors, windows production
- Export blanks
- Construction under heavy loads

Advantages:

- ✓ Any length without limits
- ✓ High strength and crack resistance

Thickness, mm: **15-100** Width, mm: **15-100** Length, mm: **2000/2500/3000/4000/6000**
 Wood species: **Conifer**

Kiln-dried sawn timber

Edged boards and beams made of pine and spruce, kiln-dried to 8–18% moisture. Meet international quality standards.

Applications:

- Furniture and woodworking enterprises
- Construction and renovation

Advantages:

- ✓ Dimensional stability, no shrinkage
- ✓ Ready for further processing
- ✓ Moisture- and damage-protected packaging

Thickness, mm: **25-200** Width, mm: **25-200** Length, mm: **2000/2500/3000/4000/6000**
 Wood species: **Conifer**
