

Let's weld the future

About us

Shtorm is the Russian advanced engineering company in the field of welding production

The company has been operating for 27 years. During this time, we have grown to professionals in the field of technologies and industrial equipment for welding and cutting metals, establishing ourselves in the eyes of many both Russian and foreign partners, producing high-quality products and providing qualified technological solutions.

Export activity

- Our company strives to support the foreign economic activity of the Russian Federation and develop its own export direction to provide quality products to foreign partners.
- We provide the equipment of our own production: welding mechanization equipment and robotic welding cells.
- In addition, we provide engineering services to solve specific customer tasks.

02

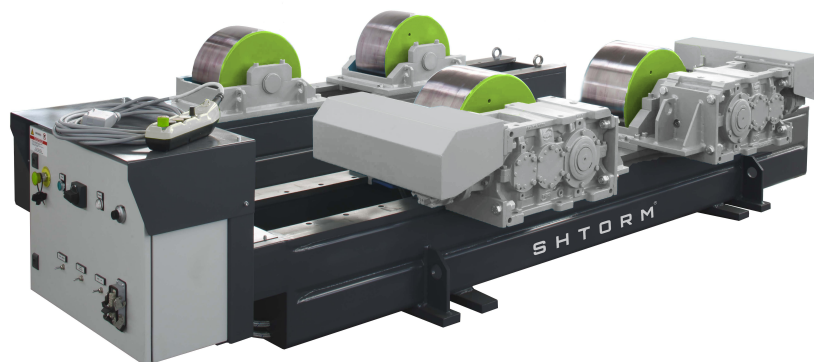

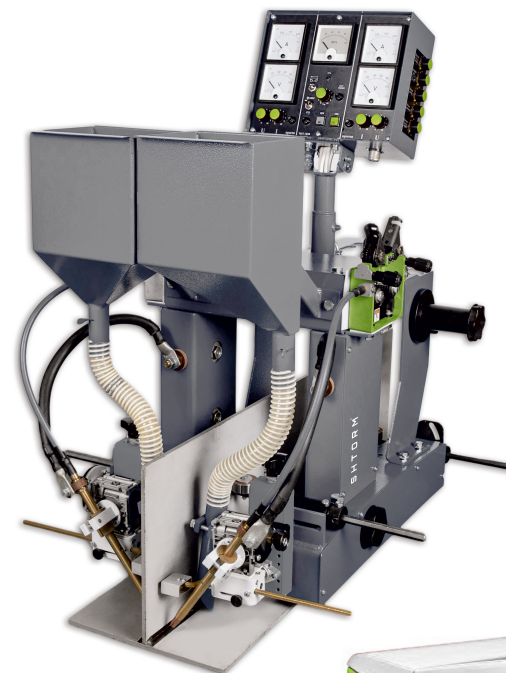

* upon request, we provide a portfolio of our works

Our scope

We are focusing on production of the following welding mechanization equipment:

- Rotary tables
- Roll positioners
- Welding carriages
- Welding tractors

Engineering services

The company provides the following engineering services in the field of welding production:

- Turnkey technical solution
- Development of welding technologies
- Equipment setup
- Programming of welding robots
- Technology and equipment training

04

Our team

The Shtorm team consists of highly qualified specialists, including doctors of engineering.

General Director

Mikhail Sholokhov
Prof. Dr.-Ing
Head of Welding automatization and robotization dept., Ural State University.
Editor of the Welding International Journal,
Author of books and training manuals on robotics and welding.

Technical Director

Andrei Zinovkin
Dipl.-Ing., Robotician
Author of books and articles on welding robotization.

Deputy Technical Department

Anton Melnikov
Dr.-Ing.

Roboticist

Aleksei Filiakov
Dr.-Ing. Senior Researcher,
Bauman Moscow State Technical University

People are
the key element
of our business.

Engineer-technologist

Daria Buzorina
Dr.-Ing. Senior lecturer of Ural State University
Author of books and training manuals on robotics and welding

Engineer

Andrei Fiveiskii
Dr.-Ing.
Head of Welding Technology Dept.,
Ural State University

Our partners

We are proud of our customers. Among them there are large-scale concerns and smaller enterprises. They choose us over and over again, because we are the team of certified professionals.

We are **experts both in robotic and in welding** that allows us to setup the equipment as precisely as possible under the client's task, thereby saving money and increasing the efficiency of processes.

More than 5 300 clients since 1995

Feel free to contact us

We will be happy to solve your technical problem and maintain business relations.
