

Autograph

GPS/GLONASS Satellite monitoring system for trucks and heavy industrial machines

Autograph GPS / GLONASS نظام مراقبة الأقمار الصناعية للشاحنات وآلات البناء الثقيلة

We don't sell equipment – We solve your vehicles control and cost reduction problems

نحن لا نبيع المعدات - نحن نحل مشاكل التحكم في المركبات وخفض التكاليف

Dear colleagues,

We provide the min data setup to start using your truck fleet control system (based on our onboard controllers and web):

Truck moving – to check every driving start, route of every vehicle and its work time in fact

Fuel consumption – on-board sensors decrease your costs up to 25-25% by providing you on-line clear info about refueling, real fuel usage and preventing fuel theft

Monitoring the operation of overhead equipment – we can provide you whole info about real work timing and fuel consumption for every unit

AutoGraph on-board controllers

AutoGraph product line – for monitoring any movement from pedestrian walking up to ship's route

Typical solution for dump truck (an example)

**Vandal-proof
box**

**Place, parking,
velocity, routes
check**

Engine check

**Sensor dump
check**

**Refueling
check**

Our customers – our proud
