

MEITAN Green - Strategic Partnership between Russia and Egypt

Export Development and Opening New Horizons of
Cooperation in Beauty and Health Product
Manufacturing

MEITAN Green is a high-tech, knowledge-intensive production within MEITAN's phytopharmacological project. We develop products based on plant raw materials from Altai and Eastern Siberia, applying a pharmaceutical approach, advanced CO₂ extraction technologies, and rigorous quality standards. The unique

ADVANTAGES

Unique Recipes

The unique MEITAN Green formulations are the result of close collaboration between the company's R&D department, scientists from Siberian research institutes, and Altai State University

Active Components

Our products contain pharmacopoeial herbs with proven efficacy, where each formula and dosage is carefully balanced to ensure optimal synergy and measurable results.

Production & Quality

- Full compliance with Halal certification requirements
- Certified according to GMP, ISO 9001, and ISO 22000:2019 international standards
- HACCP food safety management system implemented
- Comprehensive quality control at every stage – from raw materials selection to final packaging
- Modern production facilities operating in Russia, China, and India

20+ years in the market

300+ partners & offices

10+ countries of presence

1000+ product SKUs

3 production sites (RU, CN, IN)

100% quality control

International Quality Standards and Recognition of Experts and Consumers in

PHYTOPHARMACOLOGICAL PROJECT

Dry Drink Concentrates – advanced multi-component formulas in convenient single-serve sachets, designed to deliver maximum effectiveness with minimal dosage.

Liquid Concentrates – bioactive formulas enriched with targeted ingredients designed to support specific health goals – including products that help manage addictions and unhealthy habits, as well as geroprotective solutions aimed at slowing aging and promoting longevity.

Phytocapsules – innovative natural complexes based on CO₂ plant extracts from Altai and Eastern Siberia. Each formula is designed to support vital body functions, strengthen the cardiovascular and immune systems, and maintain overall wellbeing.

Altai Herbal Blends – effective combinations of several types of crushed or whole plant raw materials, conveniently packed in filter bags. Designed for the prevention and support of common health conditions as part of comprehensive wellness programs.

Functional Dragees – highly effective nutraceutical complexes developed to provide targeted support and optimization of the body's physiological functions.

Cooperation Opportunities

Export of Finished Products from Russia to Egypt

Expanding the presence of the MEITAN Green brand in the Middle Eastern market.

- Supply of phytocapsules, dietary supplements, herbal teas, and cosmetics.
- Establishment of a distribution network and local representative offices.
- Adaptation of the product range to local preferences and climatic conditions.

Utilization of MEITAN Green Production Facilities

A partnership format that allows the use of MEITAN Green's modern production capacities for manufacturing products under private or co-branded labels. We offer a full production cycle – from formulation development and raw material selection to packaging and quality control. Our facilities are certified according to GMP, ISO 9001, ISO 22000:2019, and Halal standards, ensuring full compliance with international quality requirements.
